

SaaS GTM Checklist: The Ultimate Growth Blueprint

Introduction

Thank you for downloading Neekan Consulting's comprehensive Go-To-Market checklist for SaaS startups. This actionable resource is designed to help you identify gaps in your growth strategy and implement proven tactics that drive sustainable results.

How to Use This Checklist

1. Go through each section systematically
2. Check off completed items
3. Prioritize incomplete items based on your current growth stage
4. Create an implementation timeline for outstanding items
5. Revisit monthly to track progress

PHASE 1: MARKET VALIDATION & POSITIONING

Customer Research

- Defined Ideal Customer Profile (ICP) with demographic and psychographic details
- Conducted minimum 20 customer interviews to validate pain points
- Documented buyer journey and decision-making process
- Identified key stakeholders and influencers in purchase decisions
- Analyzed competitors' customer reviews for insight gaps

Product-Market Fit Assessment

- Established clear product-market fit metrics
- Implemented NPS or similar satisfaction measurement
- Achieved minimum viable retention rates (>85% after 60 days)
- Documented "aha moment" for new users
- Identified and measured core product value metrics

Value Proposition & Messaging

- Crafted unique value proposition that addresses specific customer pain points
- Developed messaging framework for different buyer personas
- Created comparison matrices against main competitors
- Tested messaging with actual prospects (A/B testing)

- Defined brand voice and tone guidelines

PHASE 2: ACQUISITION STRATEGY

Website Optimization

- Implemented conversion-focused homepage with clear value proposition
- Created dedicated landing pages for each key persona/use case
- Set up heat mapping and session recording tools
- Optimized site load speed (under 3 seconds)
- Established mobile responsiveness across all pages
- Implemented structured data markup for SEO

Content Marketing

- Created editorial calendar aligned with customer journey stages
- Published cornerstone content for key search terms
- Implemented lead magnets for each stage of buyer journey
- Set up content distribution strategy across channels
- Established guest posting relationships with industry publications
- Created case studies showcasing customer success stories

SEO Strategy

- Conducted keyword research for industry-specific terms
- Optimized meta titles and descriptions across site
- Fixed technical SEO issues (crawling, indexing, structure)
- Built backlink acquisition strategy
- Implemented local SEO tactics (if applicable)
- Set up regular SEO performance monitoring

Paid Acquisition

- Defined channel-specific CAC targets
- Set up tracking for full-funnel attribution
- Created channel-specific creative assets
- Established A/B testing framework for ads
- Implemented retargeting campaigns
- Developed lookalike audience strategy

Social Media

- Selected primary social platforms based on ICP research
- Created platform-specific content calendars
- Set up social listening for industry mentions
- Established employee advocacy program
- Implemented social proof integration on website
- Built community engagement strategy

PHASE 3: CONVERSION OPTIMIZATION

Lead Qualification

- Implemented lead scoring system
- Created segmentation based on behaviour and demographics
- Established MQL to SQL conversion criteria
- Set up lead enrichment processes
- Developed lead nurturing workflows

Sales Enablement

- Created comprehensive sales playbook
- Developed battle cards for competitor comparisons
- Established demo script and process
- Created objection handling framework
- Set up sales email templates and sequences
- Implemented sales enablement content (case studies, white papers)

Conversion Path Optimization

- Mapped all conversion paths on website
- Identified and fixed leaky funnel points
- Optimized form fields and submission process
- Implemented exit-intent strategies
- Set up abandoned cart/form recovery
- Created compelling CTAs throughout site

Pricing & Packaging

- Conducted competitive pricing analysis
- Tested different pricing models (per user, value-based, etc.)
- Created clear pricing tiers with feature differentiation
- Implemented strategic upsell paths
- Set up self-service and sales-assisted purchase options
- Developed discount strategy for annual commitments

PHASE 4: RETENTION & EXPANSION

Onboarding Process

- Created structured onboarding sequence
- Developed in-app guidance for key features
- Established onboarding success metrics
- Implemented early warning system for at-risk accounts
- Set up milestone celebration triggers
- Created educational resources for new users

Customer Success

- Established customer health scoring model
- Set up regular business review cadence
- Created CS playbooks for different customer segments
- Implemented customer feedback loops into product
- Developed proactive outreach strategy for at-risk accounts
- Built customer community program

Revenue Expansion

- Mapped cross-sell/upsell opportunities by customer segment
- Created trigger-based expansion campaigns
- Developed referral and advocacy programs
- Established expansion pipeline methodology
- Set up account growth metrics and tracking
- Created case studies of successful expansions

PHASE 5: ANALYTICS & OPTIMIZATION

Performance Measurement

- Implemented full-funnel analytics tracking
- Set up marketing attribution model
- Created executive dashboard with KPIs
- Established channel-specific performance metrics
- Developed cohort analysis framework
- Implemented customer acquisition cost (CAC) and lifetime value (LTV) tracking

Testing Framework

- Set up A/B testing capability for website
- Created testing roadmap for key conversion points
- Established statistical significance thresholds
- Implemented multivariate testing for critical pages
- Developed experimentation database to track results
- Created test documentation process

Data-Driven Iteration

- Established data review cadence (weekly, monthly, quarterly)
- Created process for implementing insights from data
- Set up competitive intelligence tracking
- Developed process for customer feedback integration
- Implemented forecasting models for growth
- Created channel mix optimization framework
